

Jorge Nuñez Cobo

Jorge Núñez has a master in Agriculture Engineering in Water Resources from the University of Concepción, Chile. He started his professional life working with Mennonites colonies in the Paraguayan Chaco. After that, he worked for many years developing irrigation projects in Chile. He is currently project coordinator of the Water Center for Arid and Semiarid Zones of Latin America and the Caribbean and makes research in drought related issues. He also combines his work with academic activities at local universities.
