

Marcela Hebe González

Marcela Hebe González has a Ph.D. in Atmospheric Sciences from the University of Buenos Aires in Argentina. She is currently a researcher at the University of Buenos Aires and at CIMA (Centro de Investigaciones del Mar y la Atmósfera) (CONICET). Marcela's research is about precipitation interannual variability, low frequency trends and statistical prediction of seasonal rainfall in different parts of Argentina. Some students work with her. At the moment she has developed statistical seasonal rainfall models for the Limay, Neuquen and Bermejo basins.
