

**Nicolás Raab R.**

Nicolás Raab R. is an agronomist from Pontificia Universidad Católica de Chile. Nowadays he is a research assistant at the Center for Global Change at the same University. His framework centers in ecophysiology and the effect of Climate Change in Ecosystems' carbon and water vapor fluxes. Also he is working in the compilation of XX century climate data with the objective to increase the accuracy of seasonal climate forecast for Chile considering “El Niño” sea surface temperature anomalies.
