

Angel N. Menéndez.

Physicist (University of Buenos Aires, 1975), Ph.D. in Hydraulic Engineering (The University of Iowa, USA, 1983). Head of the Computational Hydraulics Program at INA (National Institute for Water, Argentina). Professor at the Engineering Department of the University of Buenos Aires. Research and Consulting activities on hydraulics, hydrology, sediment transport, river and coastal morphology, pollutant transport. Expertise in numerical simulation. Award “Ing. Luis A. Huergo”, National Engineering Academy, Argentina, 1997. Award AMCA 2002 (Argentine Association of Computational Mechanics) for the teaching, professional and scientific trajectory. Award “Hilario Fernández Long” in Computational Mechanics, National Academy of Sciences, Argentina, 2004.
