

JUAN JOSE NIETO

Current place of work: INTERNATIONAL RESEARCH CENTRE ON EL NIÑO, CIIFEN

City and Country: Guayaquil, Ecuador

Juan Jose Nieto's current position at CIIFEN is related to data products, focused on fisheries, agriculture, and risk management. His research interest is in climate and society, how to aid economic development through an understanding of climate effects. He has developed experience in this field through the development of regional climate bulletins in coordination with the met services of six countries in the west of South America. The bulletin is made by the met services using CPT as a standard tool then condensed at CIIFEN and distributed to a wide range of users from many sectors in the region. Nieto's academic background is oceanography and risk management, and for some years worked at the Oceanographic Institute in Ecuador, studying the effects of El Niño in the country. Afterwards, he gained experience in data products and information systems for decision making and communitarian network.
